

Jason Herring

Design Technologist / Principal — Creative Engineer

San Francisco, CA · jason@ordinarykids.com · otherstori.es · linkedin.com/in/ok-jason-herring

SUMMARY

Principal-level design technologist who ships — I write the code and direct the creative. 20+ years at the seam of design and engineering, now leading AI prototyping on Intuit's Foresight team: conversational and voice interfaces, real-time personality engines, and agentic systems. Built and shipped Intuit Labs (public beta to 1M+ users) and its first experiment, Delphi (delphi.intuit.com).

CORE SKILLS

Design Engineering & Creative Technology · Conversational & Voice AI · Generative AI, LLMs, RAG & Prompt Engineering · Agentic / Multi-Agent Systems · Real-Time Voice Pipelines (Vapi, LiveKit, Hume, HeyGen) · Product Design, UX & Design Systems (Figma) · Web Design / Art Direction / Visual Design · Motion & Interaction Design · Front-End Engineering (React, Next.js, TypeScript) · Node.js / Python / API Design / Real-Time Systems · Creative Direction & Brand Vision · Creative Strategy & Concept Development · Rapid Prototyping & High-Fidelity Provocation · Executive Demos & Design Leadership

EXPERIENCE

Intuit — Senior Staff Design Technologist — Foresight (AI)

Apr 2024 – Present

Mountain View, CA · Key builder on Foresight, a 100+ person AI innovation team reporting into the Chief AI Officer org.

Promoted Staff → Senior Staff; served as Group Manager (Feb–Jun 2026) before returning to a senior IC leadership track to keep building.

- Shipped Intuit Labs (labs.intuit.com/ai) — the platform that turns AI innovation prototypes into shipping product — live in public beta to 1M+ international users, with rollout to all of QuickBooks underway.
- Built both the site and the strategy behind Labs, defining how experiments graduate from speculative demo to guest-facing feature.
- Developed Labs' first experiment, Delphi (delphi.intuit.com) — financial general intelligence that turns QuickBooks data into forward-looking advisory recommendations.
- Launched QuickBooks Labs, an internal experimentation surface embedded directly inside QuickBooks proper.
- Lead R&D on emerging technology as it lands — generative AI, real-time voice, and AI personality/emotion detection (Hume); built a real-time AI personality engine from scratch on ultra-low-latency pipelines (Vapi, Hume, LiveKit, HeyGen).
- Delivered flagship demos at executive forums and summits, and built org-wide AI-literacy workshops (Demystifying Python, Shipping Conversations, AI Avatars & Voice).

Aleph — Director of Design & Technology

Mar 2020 – Apr 2024

San Francisco, CA · Creative and technical leadership for an enterprise development studio (React, React Native, Node, WordPress).

- Grew annual revenue 85%+ over four years through new-client acquisition and expanded scopes.
- Directed a Helix clinical-trials mobile app — notifications, dashboards, and protocol-compliance tools — lifting user-acquisition success 22%.
- Built and led a team of 8 engineers and 3 designers; introduced AI workflows (ChatGPT, Midjourney, Stable Diffusion) into design and delivery.

KQED — Lead UX Designer → Director of Digital Design & Development

Jan 2015 – Mar 2020

San Francisco, CA · Joined as Lead UX Designer and promoted to Director — from hands-on product design to leading the design and technology that transformed KQED.org for millions of listeners and readers.

- The Listening Project: led a complete redesign of KQED Radio, News, Arts, Science, and the homepage — persistent audio player, flexible editorial content system, and a real-time “trending” experience.
- 2016 Election Voter Guide: shipped one of public media’s first single-page apps (WordPress → Elasticsearch + React), adopted as a model across NPR member stations; the election dashboard drew 1M+ views on election night.
- Led the multi-year KQED.org redesign and migrated a large WordPress CMS from AWS to Kubernetes on Google Cloud — canary deploys and instant rollbacks, powering hundreds of thousands of articles and partner feeds (NPR, Apple News, Google News).
- Designed automated audio workflows for Alexa, Google Assistant, and NPR One; built real-time 2018 election infrastructure across every Bay Area county.

OrdinaryKids — Founder & Creative Director

Jan 2001 – Jan 2015

San Francisco, CA · Founded and ran a generative-art and creative-technology studio for 13 years — a small team treating code as a creative medium, and a hub of the SF interactive design scene.

- Pioneered generative and interactive work in ActionScript, Processing, and early creative-coding tools — custom code-driven visual systems, generative type and identity, and audio-reactive experiences years before “creative technology” was a discipline.
- Delivered flagship brand work for Nike (Skateboarding, Running, Sportswear), Adidas Skateboarding, and Brita, alongside cultural projects for MoMA, Stüssy, HUF, Tracy Chapman, and Aesop Rock — including the “None Shall Pass” music video.
- Recognized with How Magazine Best of Show, a Communication Arts Interactive Annual cover, and FWA Site of the Day honors; work archived in Taschen’s History of Web Design.
- Ran a small, tight studio that anchored the SF design scene and launched a generation of Bay Area design and creative-technology careers.

DualForces — Partner & Creative Director

Sep 2010 – Dec 2013

San Francisco, CA · Concurrent with OrdinaryKids.

- Creative-directed the Nike Free visual center — the first public use of real Nike+ data in a campaign — and ran the Nike FuelBand NYC activation (60+ events in 90 days).

EDUCATION

University of South Florida — English Literature

Hillsborough Community College — Associate of Arts

AWARDS & RECOGNITION

How Magazine, Best of Show (Interactive Annual) · Cover, Communication Arts Interactive Annual · Print Magazine
· FWA Site of the Day (multiple) · Featured in Taschen’s History of Web Design
